

Green
is nothing
new to us...

For more than two decades, Chem-Dry, the No. 1 rated carpet cleaning franchise and world's largest carpet cleaning company, has been cleaning with a safe and non-toxic solution that uses approximately one-fifth the water of steam cleaners.

Our process is copied from Mother Nature to refresh and deep clean your home's carpets without harsh chemicals.

Chem-Dry of Colorado Springs

Serving Black Forest, Cimarron Hills, Colorado Springs, Falcon, Gleneagle, and Stratmoor, CO
Independently Owned and Operated

GOING GREEN WITH CHEM-DRY MEANS
HAVING A HEALTHIER HOME.

Green & Clean
We Share Your Commitment To
The Environment

The greener carpet cleaner

All of the ingredients of The Natural[®], our proprietary cleaning solution, are on the FDA's* G.R.A.S.* list. You would not add soaps, detergents, phosphates or other harsh chemicals to our air, lakes, streams or forests; so why add them to your carpet?

Our dedication to being green is more than just words. In fact, we use one-fifth the amount of water during our cleaning process compared to steam cleaners. And, our powerful, proprietary extraction equipment ensures that carpets are dry in just 1-2 hours. Less water in your carpets means a healthier home for your family and leaves more water in our reservoirs.

Chem-Dry's green certified products

Several products meet the strict standards of the Chem-Dry Green Certified program, which examines a product's impact on people, pets and the environment. The following products have met the qualifications to be classified as Green Certified:

- The Natural[®]
- Traffic Lane Pre-Spray
- PowerGuard Protectant
- Sanitizer
- Stain Extinguisher[®]
- World Famous[®] Spot Remover
- Final Rinse
- Upholstery Wet/Foam Cleaner
- Carpet Deodorizer
- Pet Odor Remover

Certification

I certify that the below listed products meet or exceed the Chem-Dry[®] "Green Certified" Environmental Standards listed below for reduced human, and aquatic toxicity and reduced air pollution potential.

▶ Natural III-A	▶ Stain Extinguisher	▶ Upholstery Rinse
▶ Natural III-B	▶ Spot Remover	▶ Upholstery Wet/Foam Cleaner
▶ Natural IV	▶ Pet Odor Remover	▶ Carpet Deodorizer

CHEM-DRY ENVIRONMENTAL STANDARDS

HEALTH, TOXICITY AND SAFETY

Oral toxicity	LD ₅₀ >5000 mg/kg of body weight
Dermal toxicity	LD ₅₀ >5000 mg/kg of body weight
Inhalation toxicity	LC ₅₀ >20 mg/L of 20 ppm
Carcinogenicity	Products will not be accepted as a carcinogen or be listed by IARC, NTP, or CA Prop 65.

PROTECTION OF AQUATIC LIFE:

Aquatic toxicity	L(E)C ₅₀ >1-10 ppm then biodegradation must occur within a 10 day window
Aquatic toxicity	L(E)C ₅₀ >10-100 ppm then biodegradation must occur within a 24 day window
Aquatic toxicity	L(E)C ₅₀ >100 ppm then biodegradation need not occur within 28 days if a product of concern and half-life > 100 days.

Note: If product is an aquatic toxicant, then it must biodegrade rapidly and not be bioaccumulative.

No product will contain alkyl phenol ethoxylates because these materials may be harmful to aquatic life.

No product will contain inorganic phosphates because these materials may be harmful to aquatic life.

SAFETY FOR MATERIALS CONTACTED

pH requirement:
The pH of the use solution of the product will be between 3 - 10.

CLEAN AIR REQUIREMENTS

VOC
The use solution must contain less than 100g/L VOC (Volatiles Organic Compounds).

Innovation Through Chemistry

GREEN CERTIFIED

The requirements to become Green Certified consist of numerous tests that are conducted by an independent organization to measure the degree a substance is harmful.

These tests evaluate the product's impacts against Oral Toxicity, Dermal Toxicity, Aquatic Toxicity and Air Quality.
